

KAMISH UPADHYAY

Senior GenAI / AI Architect [LLMs | Agentic AI | RAG | MCP | Enterprise AI & Financial Services]

Work Ex: 9 years | Open to relocation

 +91 8755 13 9030 | tagdadatascientist@gmail.com | [Linked In](#) | [GitHub](#) | [Website](#) | [Huggingface](#) 

 Bengaluru, India

OBJECTIVE

Specializing in **Gen AI** and **LLM's fine tuning (SFT, PEFT, LoRA/QLoRA)**. Skilled in **prompt/context engineering**, **response/inference optimization**, **multi-turn dialogue systems**, and **RAG-based QnA**. Experienced in designing **agentic workflows**, and **scalable AI** solutions by ensuring **responsible AI**, **model explainability**. Responsible for **end-to-end** system implementation from client requirement till deployment, monitoring and enhancements.

EXPERIENCE

1. SBER Bank India (1.2 Years)

Bengaluru, IN

Gen AI Architect

Aug 2025 - Present

- Fraudulent money-mule networks were causing significant losses and required faster, explainable investigation.
- Architected an end-to-end XGBoost + graph analytics + GigaChat SLM for fraud platform with real-time scoring, SHAP explainability, cost-based thresholding, and an investigation agent.
- Achieved **99.5% PR-AUC**, **100% recovery of simulated fraud rings**, **4.25ms latency**, and **82% reduction in fraud losses** vs. baseline.

2. Ernst and Young LLP (1.4 Years)

Bengaluru, IN

Lead AI Engineer

Apr 2024 - Jul 2025

- Architected an enterprise **Agentic AI analytics platform** to enable natural-language analysis of sales, inventory, and logistics data.
- Designed an **LLM orchestration and tool-calling framework** for intent understanding, Text-to-SQL generation/validation, enterprise data retrieval, and dynamic Python-based visualization.
- Enabled end-to-end conversational **decision intelligence** for sales trends/comparisons, product performance, inventory issues, and logistics bottlenecks.

3. Societe Generale (2 Years)

Bengaluru, IN

Senior Data Scientist

Apr 2022 - March 2024

- Tasked with cutting manual effort in customer onboarding at Societe Generale, designed an LLM-driven platform to automate document processing, KYC verification and credit-risk assessment.
- Built the pipeline in Python: Tesseract OCR with OpenCV preprocessing for document extraction, LLM-based field validation and GenAI case summarization, and an ML credit-risk model with SHAP explanations, protected by PII masking and human-in-the-loop review, and deployed on on-premise Linux servers through Jenkins CI/CD build pipelines.

- Delivered automated, auditable compliance workflows that made onboarding faster and more consistent while keeping sensitive customer data inside the bank's own infrastructure.
- Developed a production-ready **predictive model for justifying NAV** (Net Asset Value) in investment management. Utilized **ML decision trees**, **rabbitMQ**, and a modern tech stack including python, **AWS S3**, **postgresql**, **airflow**, **docker**, and **kubernetes** to ensure scalability and operational efficiency.

4. TCS Research (3.2 Years)

Bengaluru, IN

Applied Machine Learning Engineer

Feb 2019 – Mar 2022

- **AI Chatbot:** Developed a query chatbot leveraged **NLP** for issue searching, utilized **django** framework. Handled large-scale training & prediction of ML models with **Hadoop/Spark** distributed computing systems. The next word prediction module developed using **keras** sequential model **LSTM**, **tensorFlow/PyTorch**. Utilized **A/B testing** and **MLOps** for managing the ML lifecycle.

5. GateOverflow (9 Months)

Trivandrum, IN

Applied Machine Learning Engineer

May 2018 – Jan 2019

- Performed semantic analysis on user comments using **NLTK** to extract customer sentiment and intent.

EDUCATION

Kamla Nehru Institute of Technology | KNIT

Sultanpur, IN

Bachelor of Technology, Information Technology

Apr 2014 - Apr 2018

Relevant Courses: Applied Machine Learning, AI, OOP, Data Structures, Algorithms, Databases, Operating Systems.

SKILLS

AI/ML: CNN, LSTM, XGBoost, AutoML, Predictive Modelling, Time Series, LLM Response/Inference Optimization.

GenAI: Prompt/Context Engineering, RAG, Agentic AI, SFT, PEFT, LoRA, QLoRA, MCP, OCR, vLLM.

Programming: Python, SQL, Java.

Frameworks: TensorFlow, PyTorch, FastAPI, LangChain, LangGraph, LlamaIndex, Huggingface, Wandb.

DevOps: Git, Docker, Airflow, CI/CD, DVC, LlmOps

Cloud & Data: AWS, PostgreSQL, Spark, Hadoop, GCP, MongoDB, Redis, Cassandra.

CERTIFICATIONS & CONFERENCES

Certified **Machine Learning Expert**, AppliedAI, '18 | **GATE Qualified - 97.10 percentile** | Certified **Deep**

Reinforcement Learning Expert | Udemy, '20 | Speaker, Open Machine Learning Conference, Bengaluru, '24

HONOR & AWARD

Extraordinary Performance Award, '25 | **Best Employee Award**, '25 | **CTO Appreciation Award**, '26
